

# THE ALARM SYSTEM YOU INSTALLED TODAY, MAY NOT WORK TOMORROW...

**Thursday 15th March 2018 | IFSEC, 240 Blackfriars Road, London, SE1 8BF.**

**How changes to the UK telecommunications network may affect the Fire, Security and Telecare industries.**

There's been a lot of talk in the industry about the PSTN switch off and upcoming changes happening to the telephone network. Do you want to know how these changes will impact you? We're hosting an event to provide you with all the information you need to plan the switch from analogue to an ALL-IP digital network for your new and existing alarm signalling systems.

**FREE TO ATTEND**

## SPEAKER PROFILES

### **Dave Wilkinson** – Director of Technical Services – British Security Industry Association

Dave is responsible for coordinating all technical and quality matters within the Association. These duties include acting as representative on various UK, European and International standards committees and acting as UK representative on various Cenelec and Euralarm committees monitoring EU Directives

that impact BSIA members. In addition, Dave is the industry lead for the UK's Security & Resilience Industry Suppliers Community (RISC). He is also responsible for membership liaison within the BSIA's technical sections and works closely with other industry organisations such as ABI, NPCC, Police Scotland, Security Camera Commissioner and Inspectorates on technical and any other issues that may affect BSIA members.

### **Martin Harvey** – Head of regulatory Affairs – Tyco Fire and Security

Martin has been working in the Fire and Security Industry for over 43 years. He is at present the vice president of Euralarm and is the chair of Security systems section of BSIA In addition to these roles

he is a convenor and member of a number of British and European standards committees in the fire and security world. During his time in the industry he has held a number of different positions and roles ranging from product development through to marketing and operational roles, both in the UK and Europe.

### **Paul Finch** – TSA Associate, Standards – TSA

Paul has over 30 years' experience within the Telecare monitoring and contact centre sector, and as a consultant he provides advice and support to all sections of the industry. For more than 13

years, Paul was Head of Service for a large national monitoring service with several varied business streams and was responsible for strategy development. He has witnessed the evolution of Telecare since its early inception and has a comprehensive range of operational, technical and strategic expertise.

### **Huw Saunders** – Director, Network Infrastructure, SITE – Ofcom

Huw Saunders has been in the Telecommunications industry for over 35 years working for equipment vendors, telco/service providers, as a consultant and, currently, is Director Network Infrastructure at Ofcom. He has in depth and widespread experience of all aspects of telecoms services with an emphasis

on policy, strategy, business development and service deployment. Due to the unique nature of the businesses he has worked for, this experience extends from consumers to the largest business customers, from both an incumbent and new entrant perspective, including services provided to and via other carriers and service providers. His current role focusses on network security and infrastructure development.

### **Pasquale Exius-Genco** – Chair – NICC All IP Task Group

Pasquale currently chairs the NICC Task Group challenged with reviewing and updating the standards associated with voice enabled IP networks. Pasquale has 27 years' experience in

telecoms and voice network engineering. Pasquale's background within BT plc. Includes resilient network design, PSTN signalling, corporate platform design and more recently voice over IP network architecture.

### **Chris McEwan** – Head of Future Voice & Access Products, NGA – Openreach

Chris is Head of Future Access Products at Openreach and the All-IP product Single Order GEA (SOGEA).

Chris has over 20 years of experience managing and delivering products in telecoms including mobile, PSTN and Next Generation Access broadband products.

### **John Livermore** – BT Consumer ALL IP – BT

John has worked for BT for over 30 years and has a background that covers Sales, Marketing, Logistics, Project and Product Management. During that time he worked in BT Redcare for 10 years, running their end to end business operations.

He now heads up BT Consumers Digital Voice Programme, concentrating on Special Services (Alarms and Telecare)

### **David Christie** – Solicitor: Senior Regulatory Specialist – Virgin Media

David has been at Virgin Media for six years, and specialises in telecommunications law, regulation and public policy with a particular focus on network

regulation and consumer issues. David has advised on Virgin Media's IP Voice project from its outset in 2014. Prior to joining Virgin Media in 2012 David worked for Ofcom; FieldFisher LLP; and the British Army.
