Zug, April 2014 – During the recent Plenary Meeting of Project Committee CEN/CLC TC4 “Services for fire safety and security systems” in Paris, the unanimous decision was taken to bring the draft of this Services Standard to the enquiry stage.

During the past couple of years Euralarm has been actively involved in the Project Committee CEN/CLC TC4 to create a European standard “Services for fire safety and security systems”. Meanwhile the work was supported actively by 17 European CEN/CENELEC National Standardisation Bodies (NB).

This standard is in the process of defining the minimum level of quality for the services provided for systems which fall under scope of the TC72, TC79, TC191 covering the following aspects:

- The service provider as an organization / company
- The competency of the staff of the service provider
- The results of the services provided

Although the expected standard per itself does not outline a detailed and comprised basis for a third party certification of a service provider that is valid all over Europe, it is nevertheless the first qualified document in the area “Fire & Safety and Security Systems” codifying evolved national experiences and opinions, fixed for national applications as well.

Euralarm strongly supports this standard and believes that it will help to improve the quality of the services that are provided by the fire and security industry across Europe.

About Euralarm

Euralarm, the association of European manufacturers, installers and service providers of the electronic fire safety and security industry, represents the electronic fire and security industry at European and worldwide levels.

Press Information

Euralarm provides technical and market expertise for policy making and standardization work in the field of security and fire safety. Among the main fields of activity are fire detection and alarms, intrusion detection and alarm systems, access control, video surveillance, alarm transmission and alarm receiving centre. Founded in 1970 Euralarm represents over 2500 companies having a total turnover of appr. 16.4 billion euro, 70% of the total European fire safety & security market.
