**Zug, Switzerland, October 24<sup>th</sup>, 2017 – Following a decision of its Board, Euralarm has welcomed its newest Member Teletek Electronics. The company will join the Fire Section of Euralarm, which activities cover fire detection, notification, evacuation, extinguishing controls and smoke and heat ventilation.**

Teletek Electronics will now benefit from Euralarm's services in terms of representation towards European Institutions and Standardisation Organisations. This includes the monitoring of legislative and standardisation issues relevant to the Industry. Teletek will have access to the extended network of national associations and major companies in the electronic fire safety and security sectors, which form Euralarm's membership.

### **Teletek Electronics**

Teletek Electronics manufactures a full range of intruder and fire alarm solutions, as well as communication modules and software applications for use in security systems and monitoring centers: not only separate products but complete solutions.

Headquartered in Sofia, Bulgaria Teletek Electronics counts more than 130 employees. The company exports its products to 75 countries on five continents. Over the past decades the company has manufactured more than 30 million products and realised almost a million safety and security systems for buildings worldwide.

### **Insight in European markets**

Mariela Madjarova, CEO of Teletek Electronics said: "We are delighted to join Euralarm. For us it was the right choice at this point in the development of our company. Euralarm gives us a unique insight into what is happening on other European markets and the opportunities that they might offer, it also provides a great platform to benchmark our national regulations against those of other countries and act accordingly. Euralarm is our best information source for relevant EU legislation, regulations and standards. Finally, the quality of the European, and increasingly more global network that we have now access to is without comparison."

Euralarm President Enzo Peduzzi responded: "Euralarm is proud that Teletek Electronics, a renowned international manufacturer of fire detection and security systems, has joined our association. It is the result of a careful evaluation by Teletek Electronics of the chances and benefits that Euralarm offers to Members. We are honoured that Mariela Madjarova and her team have chosen to become a Member of the Euralarm family and take this as a proof of confidence in the work that the Euralarm team has been performing for a few years. This new membership will create opportunities for both sides, as it also strengthens the association. We wish Teletek a good start and opportunities to expand their business through Euralarm."

## **About Euralarm**

Euralarm represents the electronic fire and security industry, providing leadership and expertise for industry, market, policy makers and standards bodies. Our members make society safer and secure through systems and services for fire detection, intrusion detection, access control, video monitoring, alarm transmission and alarm receiving centres. Founded in 1970, Euralarm represents over 5000 companies within the fire safety and security industry valued at 67 billion Euros. Euralarm members are national associations and individual companies from across Europe.
