

Euralarm statement on Notre Dame Fire

Zug, Switzerland, April 2019 – Both as European citizens and as professionals in the fire safety and security industry Euralarm is shocked and saddened by the horrific fire that has engulfed the Cathedral of Notre-Dame de Paris.

The Euralarm Board expresses its sympathy for the people of Paris and France. At the same time, we commend the courageous efforts of the fire department and intervention forces who put themselves at risk to protect this world heritage building.

Although at this moment in time there is no definitive explanation as to what caused the fire, there will of course be a thorough investigation. The Euralarm Board with its members will consider how it can support in the guidance on fire safety measures during construction works.

About Euralarm

Euralarm represents the electronic fire and security industry, providing leadership and expertise for industry, market, policy makers and standards bodies. Our Members make society safer and secure through systems and services for fire detection and extinguishing, intrusion detection, access control, video monitoring, alarm transmission and alarm receiving centres. Founded in 1970, Euralarm represents over 5000 companies within the fire safety and security industry valued at 67 billion Euros. Euralarm Members are national associations and individual companies from across Europe.
